-------------------------	---

ADMISSION INFORMATION

Admission

Waldameer offers free admission to the amusement park. All day Ride-A-Rama, Water World, and Combo passes can be purchased at Admission Booths located near the Dodg'em ride and the Peninsula Drive Park Entrance. Wally Cards, which can be purchased at Admission Booths and Yellow Kiosks throughout the park, can be used to pay for individual rides instead of purchasing an all-day pass.

If a Guest is wheelchair-bound and cannot use Water World's attractions, they are not required to purchase admission to Water World.

Guest Service

Guest Service is located next to the Merry-Go-Round ride. Services provided include:

- General park information
- Season Pass Processing
- Lost & Found
- Attraction accessibility information & distribution of yellow wristbands when appropriate.*
- Address guest feedback

*A Guest with a disability which prevent access rides using the entrance queue qualifies for a yellow wristband which allows them to access a ride through the accessible entrance. Up to three additional guests may accompany a Guest using the accessible entrance. Yellow wristbands are issued at Guest Service next to the Merry-Go-Round ride. For convenience, members of the party accompanying a guest needing a yellow wristband may also purchase their admission and receive their wristbands at Guest Service.

GENERAL INFORMATION

Restroom Locations

Amusement Park

- Next to Dodgem ride
- Under Park Office by Paratrooper
- Next to Steel Dragon – Family restroom accommodations
- Near Middle II Picnic Grove – Open select days only

Water World

- Changing Rooms near entrance
- Next to Waveside Grill – Family restroom accommodations

First Aid Locations

Amusement Park

- Guest Service
- Park Office

Water World

- South Side of the changing rooms along the Comet roller coaster.

If you should have a medical emergency, please contact the nearest Waldameer Team Member who will notify a trained medical responder to assist.

Service Animals

Certified service animals are welcome in most locations throughout Waldameer & Water World. Service Animals must always be in the owner's control. Owners are responsible for cleaning and disposing of any animal waste.

Service animals are not allowed on any rides or in the water of Water World attractions. We suggest a companion visit the Park with you to care for your service animal while experiencing attractions. Service animals may not be left unattended or with Waldameer Team Members. Waldameer reserves the right to limit any service animal when safety is in question.

Permitted Mobility Devices

Personal mobility devices such as wheelchairs, electric convenience vehicles, walkers, or related medically necessary transportation devices are permitted inside Waldameer & Water World.

Wheelchairs and adult strollers are available for rent on a first-come, first-serve basis next to the Arcade. A driver's license or credit card is required as collateral until the wheelchair is returned.

Prohibited Mobility Devices

For safety of all Guests, golf carts, Segway personal transporters, bicycles/tricycles, roller skates, skateboards, scooters, and hover boards are not permitted inside Waldameer and Water World.

ATTRACTION SAFETY OVERVIEW

Waldameer is committed to providing a safe environment for all our Guests and strictly enforces all safety regulations in accordance with the Pennsylvania Rider Safety and Liability Act and Pennsylvania State Amusement Ride Inspection Act, and in doing so Waldameer reserves the right to refuse any Guest admission to any ride or attraction.

PA Act No. 1994-58 Amusement Rider Safety and Liability Act:

The PA Amusement Rider Safety and Liability Act require that all riders obey all warnings and directions regarding the ride and must behave in a manner that will not cause or contribute to injury to themselves or others. Failure to comply is cause for dismissal from the park without refund.

Safety is designed into all areas of Waldameer. While most of our rides are accessible to those with disabilities, it should be noted that, in the interest of personal safety, some Guests might not be permitted to board certain rides. Access criteria are based on any Guest's ability to:

- ✓ Meet the height requirements
- ✓ Utilize all safety devices and restraints
- ✓ Maintain proper riding posture
- ✓ Safely evacuate the ride if needed. May require riding companion assistance.
- ✓ Have the mental capacity to be aware of potential hazards while riding or have riding companion assistance to do so.

Most attractions, games, gift shops, and food stands are accessible to all our Guests. In some cases, however, Guests may need the assistance from a member in their party. No Guest may compromise the safety or welfare of other Guests or Employees.

RIDE SAFETY POLICIES

Making an Informed Riding Decision

Guests with recent surgery, heart problems, high blood pressure, neck or back problems, pregnancy, motion sickness, fear of heights, sensitivity to strobe or effect lighting, or have any other condition that may be aggravated by riding must use discretion when selecting rides to enjoy. It is the responsibility of the guest to be aware of health history, limitations, and restrictions.

Our primary concern is your ability to endure the dynamics of a ride without risk to yourself, other riders, or staff members. If you suspect your health could be at risk, or you could aggravate a pre-existing condition, DO NOT RIDE. We encourage you to observe each ride through its loading, operating, and unloading cycle to determine if it is an appropriate experience for you.

Supervising Companion

Waldameer defines a Supervising Companion as a person who meets all the ride safety criteria, is qualified to understand rider instructions, and can assist a child or accompanying rider with the rider instructions. Many attractions require a Supervising Companion for guests within certain height restrictions or guests needing assistance to maintain proper riding posture. Supervising Companions are required to have a paid admission using a wristband or Wally Card.

Health Restrictions

All attraction Safety Information is posted at each attraction entrance so that you may make informed decisions on your ability to safely participate.

Guests with the conditions listed below must take careful consideration before deciding to enjoy an attractions. The Ride Description section (p. 12-27) of this booklet provides Health Restriction recommendations for each ride.

Restraint Systems

Each ride has a unique restraint device, and some rides may not accommodate guests of larger size or other body proportions. A Guest will not be able to ride if they do not properly fit the restraint system.

Artificial Limbs & Amputees

Guests may be asked to securely or remove any prostheses before riding to ensure the safety of the rider and other Guests. Artificial limbs unable to be secured or that prevent a restraint from properly functioning may prevent a rider from being able to enjoy a ride.

Loose Articles

Items such as bags, purses, hats, cameras, phones, and glasses must be placed in the designated loose article bin, left with a non-rider, or in a rented locker before riding. Waldameer is not responsible for items damaged, lost, or stolen during your ride experience.

Oxygen Tanks

Due to the variable forces, speeds, and movements of our rides, oxygen tanks are not permitted on most rides. Oxygen tanks are allowed on L. Ruth Express only.

Ride Evacuations

Although remote, there is a possibility that a mechanical problem, power failure, or adverse weather conditions may lead to an unexpected stoppage of a ride. Riders may be required to evacuate the ride using catwalks, steeply inclined ramps, or stairs. Those unable to evacuate with companion assistance may need to wait in the ride restrained in their seats for extended periods of time until additional assistance arrives. Please consider this before deciding to ride.

The following rides may require evacuation using stairs, catwalks, or steeply inclined ramps.

Ravine Flyer II
Ravine Flyer 3
Steel Dragon

Comet
Thunder River
Whacky Shack

Waldameer staff members are not permitted or trained to physically lift or carry Guests off rides in the event of an evacuation.

Ride Access Using Accessible Entrance

The accessible entrance is meant to provide access to an attraction for riders who are unable to navigate the queue and turnstile; not to necessarily bypass others already in line. A Guest with a yellow wristband must ride for their accompanying members of their party to also access the ride using the accessible entrance.

Procedure for Accessible Entrance Ride Access

1. Ring doorbell or signal arrival to Ride Operator.
2. Ride Operator will release accessible entrance gate when safe to enter.
3. Ride Operator will verify that height, safety, and admission requirements are met.
4. Remove/secure loose articles.
5. Take Seat. Companion assistance may be required to be properly seated. Ride Operators are not permitted or trained to lift or carry a rider into or out of their seat.
6. Once safe to do so, exit ride vehicle, collect loose articles, and exit the ride using accessible gate.

Re-rides: At the end of each ride, Guests wishing to ride again must leave their seat, gather loose articles, and re-enter using the queue. Guests using the accessible entrance with their yellow wristband must also leave their seat to allow the next group of riders to enter. The only occasions a Guest with a yellow wristband may re-ride without exiting and re-entering are the following:

- Ravine Flyer II: No one is in line for their row
- Seating remains after all Guests in queue for the next ride cycle are admitted

Water World – Slide Access

Water slide towers require Guests to climb steps reaching elevations as high as 45ft. All guests wishing to slide must queue behind the last person in line. A Yellow Wristband does not allow a Guest to bypass other Guests already queuing for a water slide.

Most water slide splash pools and runout areas are accessible for spectators to rejoin members of their party using the water slide.

RIDE DESCRIPTIONS

This section provides a description of each ride in terms of ride experience and accessibility.

Health Restrictions for each ride are coded by the letters A, B, C, D, E, F, G, H, and the symbols at the bottom of each page specify the restriction each letter describes.

Height, weight, and size restrictions vary based on the unique nature of each ride and the restrictions put in place by the ride manufacturer.

Each description will outline the general ride nature in terms of speed, elevation, and forces experienced. Information on prosthetics, safety restraints, and accessibility is also provided.

Forces exerted on riders are defined as the following.

- **Positive Force:** Feeling of being pushed down into seat.
- **Lateral Force:** Feeling of being pushed from left/right side.
- **Airtime:** Feeling of weightlessness or floating.

Attractions are sorted into four Categories:

- **Gentle Rides:** Rides that are mild in nature and travel at slower speeds. Direction changes are gradual and expected
- **Family Rides:** Rides that generally reach medium speeds with moderate changes in elevation or direction. Some changes may be unexpected.
- **Thrill Rides:** Rides that are aggressive in nature in which riders will experience stronger forces and unexpected changes in speed, direction, and elevation.
- **Children's Rides:** Rides that are reserved for children. Typically gentle in nature with smooth transitions in speed, direction, and elevation.

RIDE DESCRIPTIONS: Gentle Rides

Ferris Wheel

Health Restrictions: C, G

Height Restrictions: Must be 30” or taller to ride. Riders 30-42” must be accompanied by a mature Supervising Companion over 42”.

Additional Restrictions: NO SINGLE RIDERS.

Rider Criteria: Must be able to sit upright or have a Supervising Companion to assist proper riding posture. The gondola may sway as passengers enter/exit.

Ride Experience: Slowly travels in a vertical circular direction reaching a maximum height of 100 feet. Ride will be stopped several times as gondolas are loaded and unloaded.

Accessible Entrance: Exit Ramp

L. Ruth Express

Height Restrictions: Riders under 42” must be accompanied by a Supervising Companion. Handheld infants may ride free of charge in lap of a paid Supervising Companion.

Rider Criteria: Riders must be able to sit upright or have a Supervising Companion to assist proper seating posture.

Ride Experience: A gentle miniature train ride that travels along a mile-long track.

Accessible Entrance: Wheelchairs can be loaded and secured onto the train using the ramp on the East side of the station. Accessible access is also located at the ride exit.

RIDE DESCRIPTIONS: Gentle Rides

Merry-Go-Round

Health Restrictions: C, E

Height Restrictions: Riders under 42” must be accompanied by a Supervising Companion standing next to their horse. Handheld infants may ride free of charge but must ride in lap of a paid Supervising Companion in a chariot.

Rider Criteria: Riders must be able to sit upright with one leg on each side of the horse. Paid Supervising Companion may be required to stand next to horse to assist with proper riding posture.

Ride Experience: Riders are seated on horses or in chariots that travel in a circular motion. All horses move up and down as the ride rotates.

Accessible Entrance: Ride Exit. Bump stairs available to access ride platform.

Sky Ride

Health Restrictions: C, G

Height Restrictions: Must be 36” to ride. Riders 36-46” must be accompanied by a Supervising Companion

Rider Criteria: Riders must be able to sit up straight with the lap bar secured across their legs. Prostheses must be secured or removed before riding. Ride does not typically stop to load or unload, but upon request a Ride Operator can slow down or completely stop the ride for riders who may extra time to board. The ride vehicle may sway as riders board/unload.

Ride Experience: 12-minute chairlift slowly taking riders up 35’ in the air.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Family Rides

Balloon Race

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 30" or taller to ride. 30-36" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright facing forward with seatbelt fastened and ride vehicle door closed. Ride vehicles may sway when boarding and unloading. A wheelchair transfer ramp is available upon request.

Ride Experience: Family balloon-themed ride featuring eight ride vehicles that spin individually by riders.

Accessible Entrance: Ride Exit

Comet

Health Restrictions: A, B, C, D, F, G

Height Restrictions: Must be 36" or taller to ride. Riders 36-46" must be accompanied by a Supervising Companion.

Rider Criteria: Guests must have full upper body control and able to sit upright facing forward with the lap bar secured throughout the ride.

Ride Experience: Classic family wooden roller coaster reaching speeds up to 25mph and a height of 40 feet. Riders will experience unexpected changes in elevation and direction and airtime.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Family Rides

Dodg'em

Health Restrictions: A, B, C, D, F

Height Restrictions: Must be 48" drive. Riders 42-48" must ride in passenger seat. Guests under 42" are not permitted to ride.

Rider Criteria: Must have strong upper body control. Riders are secured with lap bar lowered across the stomach. Riders 42-48" must wear two shoulder strap seatbelts throughout the ride.

Ride Experience: Will experience unexpected and abrupt changes in speed and direction as cars bump into each other from all directions.

Accessible Entrance: South Ride Exit Ramp

Flying Swings

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 36" or taller to ride. Riders 36-48" must be accompanied by a Supervising Companion in a double seat.

Rider Criteria: Must be able to sit upright with feet dangling below the seat and have full upper body control. Lap bar must be able to be lowered with the seatbelt between the legs latched. Prostheses must be secured or removed before riding. The seats may sway during boarding/unloading. Ride may not accommodate guests of larger size.

Ride Experience: Circular ride with individual swing seats suspended from a central tower that gently rises and rotates.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Family Rides

Paratrooper

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 36" or taller to ride. Riders 36-46" must be accompanied by a Supervising Companion.

Rider Criteria: Must have full upper body control and be able to sit upright with feet dangling below the car with the lap bar closed across their legs. Prostheses must be secured or removed before riding. Cars may sway when boarding/unloading.

Ride Experience: Riders travel in suspended cars in a tilted circular motion reaching a maximum height of 30'.

Accessible Entrance: South side of the ride by the Potato Patch seating area.

Pirate's Cove

Health Restrictions: H

Height Restrictions: Must be 30" or taller to enter. Guests 30-42" must be accompanied by a Supervising Companion.

Ride Experience: Family walkthrough attraction featuring a pirate theme. guests will encounter disorienting optical illusions, strobe/effect lighting, tight hallways, moving floors, and scenes that may frighten younger guests.

Accessible Entrance: If unable to pass through the queue and turnstile, the attraction can be accessed from exit gate, but all guests will navigate two stairs at the building entrance.

WARNING: Attraction utilizes strobe lights and specialty ride lights.

RIDE DESCRIPTIONS: Family Rides

Ravine Flyer 3

Health Restrictions: A, B, C, D, F

Height Restrictions: Must be 40" or taller to ride.

Rider Criteria: Must have full upper body control and able to sit upright facing forward with the lap bar lowered securely against the body. Larger riders must enter seat first. Ride may not accommodate guests of larger size.

Ride Experience: Family steel roller coaster that travels on slopes and curves over a pond. Riders will experience lateral forces that will push riders to the right side of the car.

Accessible Entrance: Ride Exit

Scrambler

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 36" or taller to ride. Riders 36-48" must be accompanied by a Supervising Companion.

Rider Criteria: Must have full upper body control and able to sit upright facing forward with the car door closed and latched. Smaller riders must enter the car first.

Ride Experience: Family spinning ride that spins on the ride axis and simultaneously on the axis of the ride vehicles. Riders experience lateral forces.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Family Rides

SS Wally

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 30" or taller to ride. Riders 30-40" must be accompanied by a Supervising Companion.

Rider Criteria: Must have full upper body control and able to sit upright facing forward. Riders are secured by a lap bar across the waist. Ride may not accommodate guests of larger size.

Ride Experience: A family boat ride that will rock back and forth while spinning.

Accessible Entrance: Ride Exit.

Spider

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 36" or taller to ride. Riders 36-46" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright with the ride vehicle door closed.

Ride Experience: Family thrill ride that rotates and oscillates at varying elevations with the ride vehicles able to spin freely. Ride will be stopped several times as the ride is loaded/unloaded.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Family Rides

Tilt-A-Whirl

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 36" or taller to ride. Riders 36-46" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright facing forward with lap bar lowered across the waist.

Ride Experience: Classic family spinning ride that features a sloping rotating platform with cars able to spin freely.

Accessible Entrance: Ride Exit

Wendy's Tea Party

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 30" or taller to ride. 30-36" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright facing forward.

Ride Experience: Family teacup ride with a rotating platform with six cups that can be spun by riders.

Accessible Entrance: Ride Exit or wheelchair accessible ramp.

RIDE DESCRIPTIONS: Family Rides

Whacky Shack

Health Restrictions: B, C, D, H

Height Restrictions: Must be 30" or taller to ride. 30-42" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright facing forward with lap bar lowered. Combined rider weight may not exceed 400 pounds per car.

Ride Experience: Classic haunted house ride where cars travel along an electrified track through a two-story building featuring optical illusions, haunted scenery, flashing lights, and unexpected changes in direction.

Accessible Entrance: Marked gate on black fence in front of the ride.

WARNING: Ride utilizes strobe lights

Whirlwind

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 36" or taller to ride. Riders 36-48" must be accompanied by a Supervising Companion.

Rider Criteria: Must have at least one functioning leg extending to the knee. Must have full upper body control and able to sit upright with seatbelt buckled between legs and lap bar lowered across waist. Ride may not accommodate guests of larger size.

Ride Experience: Family spinning roller coaster that travels multiple times around a gently sloped figure-eight track. Cars rotate freely throughout ride.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Thrill Rides

Ali Baba

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 42” or taller to ride

Rider Criteria: Must have full upper body control and be able to sit up straight with their head against the seat back. Prostheses must be secured or removed before riding. Riders are secured by over-the-shoulder harnesses. Ride may not accommodate guests of larger size or those with broad shoulders.

Ride Experience: Flying carpet ride that swings in a vertical circular motion reaching a maximum height of 55 feet. Riders experience lateral forces and airtime.

Accessible Entrance: Ride Exit

Chaos

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 48” or taller to ride

Rider Criteria: Riders must have at least one leg that extends to the knee and one functioning arm. Must have full upper body control and able to sit upright with head against the headrest. Riders are secured with an over-the-shoulder harness with a seatbelt that must fasten between the legs. Ride may not accommodate guests of larger size.

Ride Experience: Swinging pendulum ride that takes riders upside down 60ft in the air. Riders will experience positive forces and airtime.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Thrill Rides

Mega Vortex

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 48" or taller to ride.

Rider Criteria: Must have full upper body control and able to sit upright with one leg on each side of the seat with chest against the seat and restraint secured across the lower back. One leg must be on each side of the seat.

Ride Experience: A rotating circular disk travels along a 47ft tall u-shaped track.

Accessible Entrance: Ramp adjacent to Ride Exit

Music Express

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 52" or taller to ride.

Rider Criteria: Must have at least one functioning leg and one functioning arm. Riders must have full upper body control and be able to sit upright facing forward with the lap bar closed. Smaller riders must enter the ride vehicle first.

Ride Experience: Aggressive thrill ride travelling in a circular path at varying speeds both forwards and backwards with abrupt changes in elevation. Riders will experience lateral forces that will press riders to the left side of their car.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Thrill Rides

Ravine Flyer II

Health Restrictions: A, B, C, D, F, G

Height Restrictions: Must be 48” or taller to ride.

Rider Criteria: Must have at least one functioning leg that extends to the knee. Must have full upper body control with ability to sit upright facing forward. Seatbelt must be fastened and lap bar lowered against waist. Prostheses must be secured or removed before riding. May not accommodate guests of larger size.

Ride Experience: A large wooden roller coaster featuring unexpected changes in speed, direction, and elevation. Riders will experience a combination of strong positive forces, lateral forces, and airtime.

Accessible Entrance: Ride Exit

Sea Dragon

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 36” or taller to ride. Riders 36-48” must be accompanied by a Supervising Companion.

Rider Criteria: Must have full upper body control and ability to sit upright facing forward with the lap bar secured across the stomach. Ride may not accommodate guests of larger size.

Ride Experience: Swinging ship reaching a maximum height of 54’. Riders will experience strong positive forces and airtime.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Thrill Rides

Steel Dragon

Health Restrictions: A, B, C, D, E, F, G

Height Restrictions: Must be 46” or taller to ride. Riders 46-50” must be accompanied by a Supervising Companion. Maximum height 78”.

Rider Criteria: Must have at least one functioning leg extending to the knee and one functioning arm. Must have full upper body control and the ability to sit upright facing forward with lap bar lowered against waist. May not accommodate guests of larger size.

Ride Experience: Compact steel roller coaster in which cars spin freely. Ride features unexpected changes in speed, direction, and elevation.

Accessible Entrance: Ride Exit

Thunder River

Health Restrictions: A, B, C, D, F, G, H

Height Restrictions: Must be 36” or taller to ride. Riders 36-42” must be accompanied by a Supervising Companion.

Rider Criteria: Must have full upper body control with ability to sit upright with one leg on each side of seat. Ride will not stop to load or unload under any circumstance. Log boats do not have seatbelts.

Ride Experience: Family water ride where log boats travel along a water-filled trough that features a foggy tunnel, rapids, and two large drops that will get riders wet.

WARNING: Ride utilizes strobe lights

RIDE DESCRIPTIONS: Thrill Rides

Wipeout

Health Restrictions: A, B, C, D, E, F

Height Restrictions: Must be 42" or taller to ride.

Rider Criteria: Must have at least one functioning leg extending to the knee. Must have full upper body control and able to sit upright facing forward with seatbelt buckled and lap bar lowered across waist. Ride may not accommodate guests of larger size.

Ride Experience: Ride that spins forwards and backwards while tilted. Riders will experience lateral forces.

Accessible Entrance: Ride Exit

XScram

Health Restrictions A, B, C, D, F, G

Height Restrictions: Must be 48" or taller to ride.

Rider Criteria: Must have at least one leg that extends to the knee and one functioning arm. Must have full upper body control with ability to sit upright with head against the headrest and shoulder harness lowered against the torso. Seatbelt must be buckled between legs. Prostheses must be removed or secured before riding.

Ride Experience: Drop tower thrill ride where riders slowly rise 140ft, then unexpectedly freefall reaching 47 mph. Riders will experience strong airtime and positive forces.

Accessible Entrance: Ride Exit

RIDE DESCRIPTIONS: Children's Rides

Big Rigs

Height Restrictions: Must be 30" or taller to ride. Riders 30-36" must be accompanied by a Supervising Companion. Riders over 54" must accompany a rider 54" or under.

Rider Criteria: Must have full upper body control and able to sit upright with doors closed and seatbelts fastened.

Ride Experience: Convoy ride that travels slowly along a flat, winding track and through a short tunnel. Riders sit either inside truck or top seats designed to accommodate parents accompanying children.

Frog Hopper

Health Restrictions: A, B, C, D, F, G
Height Restrictions: Must be 30" or taller to ride. Riders over 54" must accompany a rider under 54" or under.

Rider Criteria: Must be able to sit upright with feet dangling below the seat and lap bar lowered. Prostheses must be removed or secured before riding. Ride may not accommodate guests of larger size.

Ride Experience: Children's ride that slowly raises riders 20 feet in the air and bounces down to the ground.

Happy Swing

Health Restrictions: B, C, D

Height Restrictions: Must be 31" to ride. 31-36" must be accompanied by a Supervising Companion.

Rider Criteria: Must be able to sit upright with feet dangling below the seat. Riders are secured with a lap bar and seatbelt that attached between the legs. Prostheses must be removed or secured before riding. Ride may not accommodate guests of larger size.

Ride Experience: Children's swing ride that accommodates parents.

Lil' Toot

Health Restrictions: B, C

Height Restrictions: Must be between 30" and 54" to ride.

Rider Criteria: Must have upper body control and able to sit upright with the seatbelt fastened. Ride may not accommodate children of larger size.

Ride Experience: Handcar ride that children use their arms to propel their cars slowly along a flat track. Supervising companions may follow behind the handcars using a pushing rod to assist riders.

Pony Carts

Health Restrictions: B, C (note symbols below)

Height Restrictions: Must be between 30" and 54" to ride.

Rider Criteria: Must have full upper body control and able to sit upright without assistance with seatbelt fastened across lap. All guests enter and exit through one gate in which riders will have to navigate one step.

Ride Experience: Children's ride featuring eight ponies that pull chariots that move up and down in a bouncing motion.

Sky Fighter

Health Restrictions: B, C

Height Restrictions: Must be between 30" and 54" to ride.

Rider Criteria: Must have full upper body control and ability to sit upright facing forward unassisted with seatbelt fastened across lap. There is one step onto the boarding platform and two steps into each ride vehicle. All guests enter and exit through the same gate.

Ride Experience: Children sit in airplane themed cars that travel in a circular motion and raise 8 feet off the ground.

Umbrella Ride

Health Restrictions: B, C

Height Restrictions: Must be between 30" and 54" to ride.

Rider Criteria: Must have full upper body control and ability to sit upright facing forward unassisted with seatbelt fastened across lap. There is one step into each ride vehicle.

Ride Experience: Children sit in different vehicles that travel in a circular motion under a large rotating umbrella.

Wet Boats

Height Requirements: Must be between 30" and 54" to ride.

Rider Criteria: Must have full upper body control and ability to sit upright facing forward unassisted. There is one step into each boat. Boats may tilt during boarding and unloading.

Ride Experience: Children's boat ride with six boats that slowly rotate around a shallow pool.
